Patient card, eICU-CRD demo: High reference risk

Composite score (sum of channel evidence) 9.30 nats [95% band 7.15 to 11.39]
percentile among MIMIC-IV training stays: 96 (band: 94 to 98)
Reference stratum (MIMIC-IV training, frozen cut points):
quartile 4 of 4: mortality 29.5% (28.6-30.4%)
decile 10 of 10: 44.3% (42.8-45.8%)
bin 20 of 20: 53.1% (51.0-55.3%) band spans bins 19 to 20
Cohort rate 10.3%. 18 of 19 channels measured. 400 draws.

Evidence per channel, by system

Rarity of the value within its channel

Grey strips: the channel's MIMIC-IV training distribution (1st-99th, 10th-90th percentile; white tick = median). Open circles: unmeasured, L = 0.
† A term of this channel lies outside its training support; the value is extrapolated.
