Patient card, eICU-CRD demo: Low reference risk

Composite score (sum of channel evidence) -8.28 nats [95% band -8.79 to -7.73]
percentile among MIMIC-IV training stays: 16 (band: 13 to 19)
Reference stratum (MIMIC-IV training, frozen cut points):
quartile 1 of 4: mortality 0.6% (0.5-0.8%)
decile 2 of 10: 0.6% (0.4-0.9%)
bin 4 of 20: 0.5% (0.3-1.0%) band spans bins 3 to 4
Cohort rate 10.3%. 14 of 19 channels measured. 400 draws.

Evidence per channel, by system

Rarity of the value within its channel

Grey strips: the channel's MIMIC-IV training distribution (1st-99th, 10th-90th percentile; white tick = median). Open circles: unmeasured, L = 0.
Band end points mapped through the same reference
† A term of this channel lies outside its training support; the value is extrapolated.
